

# Faith

God plants a seed in your heart and waits for it to grow,  
Once in the ground, nothing can be seen of what lies below.  
You must have faith that God is at work and in time you will see,  
The great and good things that God has planned for you and me.  
When the plant breaks through the ground, opposition it does meet,  
Wind will blow, storms come, and hot sun sometimes on it will beat.  
But it takes the sun, the wind, and the stormy rain that may come,  
To make the little plant strong and grow while it is yet young.  
The seed is like faith, the substance of things not seen,  
But you continue to hope to soon see something green.  
So keep in mind this little plant has to work to come up out of the sod,  
So his children, too, must work to reap the harvest for our God.  
So continue to pray, read His Word and be willing to share,  
Many times fear will come and life will become very hard to bear,  
But perfect love casts out all fear of whatever life may bring.  
So nourish that plant with His Word and His praises forever sing.
